
a
CLIP-seq
Sequence input
N residual blocks
Output heads
Control
Target
Total
Loss(SMI)
Loss(eCLIP)
Penalized mixing
RBP 1 ; Cell Line A
Signal
SMI
223 RBP-Cell-Line
Convolution
Dilated convolution
Batch normalization
ReLU activation
Dropout
Embeddings
Multitask model: 223 RBP-Cell Lines
Predicted / True shape
Signal
Embeddings for sequence representation
Sequence biotype representation
RNA families
Predict gene-wise RNA processing measurements
Translation
Intron retention
Nucleotide-wise predictions (splicing)
Prediction of binding profiles from sequence
Performance evaluation
Interpretation
Mutation impact
